Microsoft

Lead Architect Program
Invitation

Pedro Dias
Technical Evangelist
pedias@microsoft.com | 91 69 82 63

The Lead Enterprise Architect Program (LEAP) is a program targeted at developing know-how and insight on core components of the Microsoft platform. The audience is software architect at Microsoft partners and customers.

The core deliverables of LEAP are 5 master class training sessions and a journey to Redmond together with the other LEAP participants. LEAP will cover the Microsoft platform from a holistic point of view. The trip to Redmond will be in January. The master classes are held monthly, starting in February and ending in June.

The program fee is 18.000 NOK excl. VAT. This includes all session, dinners and selected tours. Flights and accommodations for the Redmond trip are not included in the fee.

Deadline for applying is Friday, December 13th.

february–June***

How IT can drive more efficiency and deliver new forms of value

Data Insight

Hybrid cloud

DevOps

People Centric IT

* Master class titles subject to change

Audience-Profile and Target groups

Participants within LEAP should be **architects or lead developers**.
The trainings are optimized for persons with the following profiles:

Software architects or **senior software developers** with experience of adopting parts of the Microsoft platform without a holistic view on it.

Senior software architects or **senior infrastructure architects** with experience in the adoption of **competitive products and technologies** but with less experience on the Microsoft platform.

LEAP

Speakers, Seattle sessions

During the 3-day visit to the executive briefing center in Redmond you will hear and be able to interact with Microsoft industry leaders where each presents their field of expertise in a one-hour session each.
Among these **Scott Guthrie, Amir Netz**, **James Whittaker** and **Ulrich Homann** to name a few.

For a full overview of the speakers and their backgrounds please visit our speaker page:

Master classes

The five master class sessions will be held at Microsoft's office in Lysaker, Norway.

The master classes are the essence of LEAP and is where the architecture discussions happen. Each masterclass is lead by one or more experts on the field.
